

PICHAYA DEACHPOL

Senior Customer Application Engineer

About Me

With 8 years of experience as a Developer Engineer, I specialize in Mobile and Web Applications using RFID technologies, particularly NFC. I am skilled in Android native Java, Flutter, and web tools like Vue.js, JavaScript, and PHP, with experience in serverless architecture and database management in Azure and Firebase. I am passionate about creating better applications and exploring UX/UI design and design thinking to enhance the development process.
